

Male Reproductive Anatomy

What are the 6 basic components of the male reproductive tract?

Why are the testis housed outside of the body?

Scrotum layers:

Layer	Definition
Scrotal Skin	
Tunica Dartos	
Scrotal Fascia	
Parietal Vaginal Tunic	

What are some ways that thermoregulation occurs?

Testis Layers:

Structure	Definition
Testicular Capsule	
Parenchyma	
Mediastinum	
Rete Tubules	

The Parenchyma is composed of two parts, what are they and what do they contain?

What are the functions of the testes?

Epididymis:

Structure	Function
-----------	----------

Caput (Head)	
Corpus (Body)	
Cauda (Tail)	

Where is sperm stored?

Where does sperm mature?

Where are sperm produced in the testes?

What three things make up the spermatic cord?

What are the two parts of the penis?

What are the two types of penis and what species have them?
